

Material Safety-Data-Sheet Brantho-Korrux in the "Komfortdose" I + II (high-build aerosol-can)

according to 1907/2006 (does not concern standard pre-filled spraycans)

Last revision: 1.10.2016

Date: 1.10.2016

page 1/3 + appendix (tentative translation)

1. Designation of the mixtures and of the company

1.1. Product identifier:

Brantho-Korrux in 400ml-Komfortdose I +II (ex-works high-build aerosol-can, not pre-filled-spraycans,)

1.2. Intended use: protective coating, paint, enamel, varnish, primary coating, rust prevention, metal prevention, maintenance paint for spraying ; manual for interior and exterior regions; for industrial- or commercial-workman like- and hobby sector

1.3. Company/undertaking identification:

Branth-Chemie A.V. BRANTH * Telephone: +49 40-369740-0 * Telefax: +49 40-367148

Biedenkamp 23, D-21509 Glinde/Hamburg, Germany

e-Mail: Branth-Chemie@t-online.de

Information through: SALES /TECHNICAL SERVICE: +49 40-369740-0 (Mo.-Do. 8-16 Uhr, Fr. 8-13 Uhr)

1.4. Emergency phone (in Germany): Giftnotrufzentrale Göttingen: 0049 551-19240

2. Hazards identification (liquid product, not dry paint)

2.2. Labelling according to VO 1272/2008/EG (GHS, CLP)

Hazard pictograms:

GHS02
Flame

Aerosol 1
H222;229

Signal word: Danger

Hazard statements: Extremely flammable aerosol; pressurized container: may burst if heated (H222, 229).

Precautionary statements: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Protect from sunlight and do not exceed temperatures more than 50°C/122°F. Do not pierce or burn, even after use.

Keep out of reach of children. Use only outdoors or in well-ventilated area. Without sufficient ventilation the formation of explosive vapour/air mixtures cannot be excluded. Dispose of contents/container according to national/local rules.

(P102, 210, 251, 271, 410/412, 501.1).

2.3. Characterization: high-solids coating material; air drying

3. Information on ingredients

3.2. Mixtures

%-share of substances classified as hazardous to health or environment

Appendix: Letter	Trade names	
	Brantho-Korrux in the high-build aerosol-can	
	<u>"Komfortdose" I</u> 12 standard colours	<u>"Komfortdose" II</u> other colours

Continued on page 4: Detailed Information see appendix Material-Safety-Data-Sheet.

4. First Aid measures

4.1. General: In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. **Inhalation:** Remove to fresh air, keep patient warm and at rest, if breathing is irregular or stopped, administer artificial respiration. Give nothing by mouth. If unconscious, place in recovery position and seek medical advice immediately. **Eye contact:** Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart and seek medical advice. **Skin contact:** Remove contaminated clothing. Wash skin thoroughly with soap and water or use recognised skin cleaner. Do not use solvents or thinners. **Ingestion:** If accidentally swallowed obtain immediate medical attention. Keep at rest. Do not induce vomiting.

4.2. Long term: Serious long term effects are not known for the substances used in this preparation.

4.3. Please show Safety-Data-Sheet to the doctor.

5. Firefighting measures

5.1. Extinguishing media: recommended: alcohol resistant foam, CO₂, powders, water spray/mist

Not suitable: water-jet

5.2. Recommendations: fire will produce dense black smoke. Inhalation of decomposition products may cause a health hazard. **Additional protection:** when fire fighting appropriate breathing apparatus is required

5.3 Advice for firefighters: sealed containers in the proximity should be cooled with plenty of water. Disposed water should not be allowed entering drains.

6. Accidental release measures

6.1. Personal protection: Refer to instructions listed in sections chapter 7 and 8

6.2. Environmental protection: Do not allow entering drains or watercourses. If the product contaminates lakes, rivers or sewages, inform appropriate authorities in accordance with local regulations.

6.3. Cleaning/disposal: Collect spillage with non-combustible absorbent materials or mechanically.

Material Safety-Data-Sheet Brantho-Korrux in the "Komfortdose" I + II (high-build aerosol-can)

7. Handling and storage

Handling

7.1. Recommendations for safe handling: Use only in areas from where naked lights and other ignition sources have been excluded. Electrical equipment should be protected to the appropriate standard. Avoid skin and eye contact. Avoid inhalation of vapour and spray mist. Smoking, eating and drinking should be prohibited in application area. For personal protection: see section 8. Comply with the local health and safety laws at work. Do not empty using pressure.

7.2. Storage

Requirements for storerooms and containers: Keep containers closed. Smoking prohibited.

Combined storage: Keep away from oxidising agents, strong alkaline and strong acid materials.

Additional storage requirements: Observe label precautions. Store in well-ventilated, cool and dry, areas; away from sources of heat and direct sunlight.

Storage classification: 2B

7.3. Specific end use: see chapter 1.2.

8. Exposure controls / personal protection

8.1. Ingredients with occupational exposure limits: see 3.2 (page 1) and appendix (page 4)

8.2. Engineering measures: Provide adequate ventilation. Where reasonably practical this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient, use suitable respiratory equipment (see below).

8.2.1. Personal protection equipment

Protective and hygiene measurements: All parts of the body should be washed after contact. Smoking, eating and drinking is prohibited during working.

Respiratory protection: When workers are exposed over the occupational exposure limits (o.e.l.) acc. 8.1 or when aerosols might occur they must use appropriate certified respirators. Please check application conditions and rules of the relevant association (rules for using respiratory equipment). The possible risk of fine aerosol should be considered when choosing the appropriate respirator (follow manufacturer's recommendations).

Hand protection:

Wear gloves that are suitable for chemicals according EN 374. The gloves shall be certified for suitability for the exposure regarding resistance, anti-static properties etc. Please follow the recommendations of the manufacturer of the gloves. Protective gloves shall be replaced immediately when damaged or at first signs of wear and tear. Application should be planned in a way that it is not necessary to wear protective gloves during an extended period of time. Suitable materials are: Nitrile-rubber; material strength: > 0,4 mm, penetration time: > 480 minutes. At longer exposure with liquid paint or thinner higher a material strength or gloves with a barrier layer shall be used. Follow manufacturer's recommendations. Repeated or prolonged contact with the preparation causes removal of natural fat from the skin resulting in non-allergic contact dermatitis and absorption through the skin, especially when paint-stained skin is repeatedly cleaned with aggressive cleaners/solvents. If the application conditions are impeding that gloves are not worn, it is recommended to use barrier creams before and after. Barrier cream help to protect the exposed areas of skin.

Eye protection: In cases of possible splashes wear protective glasses according EN 166.

Skin protection: During normal application with brush and roller extra skin protection is not required. If, due to application conditions or method, the risk of contact cannot be avoided, electrostatic conduction (protective) clothing (cotton) can be worn. Follow manufacturer's recommendations.

8.2.2. Environmental Data: The preparations are **not** subject to "environmental hazardous-N" labelling-requirements. Further data see chapter 3 (page 1) and appendix (page 4) for single substances.

9. Physical and chemical properties

Trade names	Brantho-Korrux in the "Komfortdose" I + II (high-build aerosol-can)
9.1. physical state	Aerosol
colour	various
Smell	aromatic
change in condition	evaporation, thickening due to not closed condition
Flash point (DIN 53213)	< 0° C
Ignition temperature (DIN 51794)	235 °C
Fire supporting properties/Auto ignition	no/no
Explosion hazard due to	During application explosive or extremely flammable-air-mixture is possible
Explosion limits lower/higher	UEG 3% Vol., OEG 19% Vol. (from literature)
Vapour pressure at 20° C	3.400 h Pa (from literature)
Density at 20° C	depends on colour
Solubility in water at 20° C	low miscibility
Viscosity at 20° C 4 mm (DIN 53211) bzw. 6 mm (ISO 2431)	not measurable
Solvent content (% by weight)	>50%
9.2. Solvent separation test ADR/RID	not applicable
Solids content/ph value	<40% / --

Material Safety-Data-Sheet Brantho-Korrux in the "Komfortdose" I + II (high-build aerosol-can)

according to 1907/2006 (does not concern standard pre-filled spraycans)

page 3/3 + appendix (tentative translation)

Branth-Chemie A.V. Branth - Biedenkamp 23 * D-21509 Glinde/Hamburg, Germany

10. Stability and reactivity

10.1. Reactivity: see chapter 10.5.

10.2. Chemical stability: No hazardous reaction when handled and stored according to provisions.

10.3. Possibility of hazardous reactions: see chapter 10.2. and 10.5.

10.4. Conditions to avoid: see chapter 10.5.

10.5. Incompatible materials: Keep away from oxidising agents, strong alkaline and strong acid materials in order to avoid exothermic reactions.

10.6. Hazardous decomposing products: exposure to high temperatures may cause hazardous decomposition products such as carbon monoxide and dioxide, smoke, oxides of nitrogen.

11. Toxicological information: see chapter 3. (page 1) and appendix (page 4)

11.1. see chapter 2 for the mixture; see chapter 3 and appendix for composition of substances

11.2. General: There are no data available on the preparation itself. Liquid splashed in the eyes may cause irritation and reversible damage. Generally the combination of solvent vapours and alcohol consumption is considered health endangering. Exposure to solvent vapours above the stated o.e.l. may lead to adverse health effects such as: irritation of the mucous membranes and resp. organs, headache, dizziness, fatigue and adverse effects to the kidneys and liver, central nervous system and, in extreme cases, loss of consciousness. **The preparations contain:** binders/resins (natural and sythetic-modified), organic and/or inorganic pigments (e.g. titanium dioxide, talcum, iron oxide) aromatic-free solvents (see 8.2.), lead-, zinc- and chromate free anti corrosive pigments, additives (< 1 %) e.g. Butanonoxim. Substances may cause allergic reactions. Upon request (in case of allergic suspicion) the preparation can be manufactured without Butanonoxim Skin-formation) as custom coating. When covering large areas with solvent containing coatings in confined spaces (buildings) it is recommended to properly ventilate during and after application. Also during the following days regular ventilation is recommended.

12. Ecological information

12.1.-12.6. see chapter 3 and appendix for composition of substances

12.7. There are no data available on the preparation itself. The product should not be allowed to enter drains or watercourses.

13. Disposal considerations

13.1.1. Product: Waste material should be disposed of (see local directions).

Note regulations of law, waste identification number: 080111 or 080112.

For all products listed here, completely dried waste paint (including brushes, rollers, filler mats etc.) are **no** hazardous waste.

13.1.2. Containers: Empty containers entirely with a brush, do not wash. Fully emptied, dry containers can easily be recycled.

Containers not properly emptied are special waste (waste identification number: 150110).

13.1.3. Do not dispose of in wastewater.

13.1.4. Product should be used completely.

14. Transport information

14.1 ADR, IMDG, IATA: UN number: 1950; **14.2. ADR:** compressed gas packaging; **IMDG:** Aerosols; **IATA:** Aerosols, flammable;

14.3. ADR: class 2 (5F gas), hazard label 2.1; **IMDG + IATA:** class 2.1, label 2.1

14.4. ADR, IMDG, IATA: not classified; **14.5.** no marine pollutant

14.6. Caution: gas, EMS-Nr. F-D, S-U; **14.7.** no transport in bulk.

Additional transport information for land transportation (ADR): limited quantity, LQ (max. 12x0,4ltr. = 4,8 ltr. per carton)

Additional transport information for sea transportation (IMDG): "LQ"; marine pollutant: no

Additional transport information for air transportation (ICAO/IATA): dangerous goods

15. Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Trade name	Brantho-Korrux in the "Komfortdose" I + II (high-build aerosol-can)
TA-Luft (Gew. %): Kl. I / II / III	0/0/60
Water polluting danger	1 = small potential
VOC-value (g/l)	630 g/l
Product code by GISBAU accord.	

15.2. No Chemical Safety Assessment has been carried out for this mixture.

16. Other information

I. Indication of changes: MSDS-changes that represent a worsening/deterioration due to a change in our product composition are highlighted by vertical marks in the margin. Changes due to (once again) changed laws and regulations, editorial changes or facilitations/improvements are not marked.

II. Abbreviations and acronyms: You can require a list of all used abbreviations and acronyms separately in German language.

III. Important final informations: The information of this MSDS is based on the present state of our knowledge and on current EEC laws. Users working conditions are beyond our knowledge and control. The product is developed to meet the highest environmental standards, it should not be used for other purposes than those specified under chapter one. It is always the responsibility of the user to take all necessary steps in order to fulfil the demands laid down in the local rules and legislation. The information herein is meant as a description of the safety requirements of our product: it is not to be considered as a guarantee of the products properties. The appendix ist part of the MSDS.

Explanation: R-, S-, H and P-phrases:

Xi = irritant; Xn = injurious to health; N = environmental hazardous.

H220 Extremely flammable gas; H226 Flammable liquid and vapour. H280 Contains gas under pressure; may explode if heated;

H222 Extremely flammable aerosol; H229 Pressurized container, may explode if heated;

H304 May be fatal if swallowed and enters airways; H336 May cause drowsiness or dizziness;

H225 Highly flammable liquid and vapour; H319 Causes serious eye irritation;

P102 Keep out of reach of children; P210 Keep away from heat/sparks/open flames/hot surfaces.-No smoking;

P251 Pressurized container: Do not pierce or burn, even after use;

P271 Use only outdoors or in well-ventilated area; P410/412 Protect from sunlight and do not exceed temperatures more than 50°C;

P501.1 Dispose container properly.

EUH066 Repeated exposure may cause skin dryness or cracking.
